

FM History reporting for “At Risk” fields

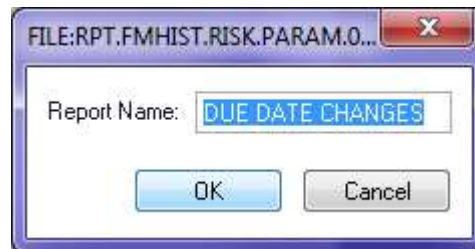

There are two parts to the process:

First run the parameters PowerOn (repgen) and you will see the following prompts:

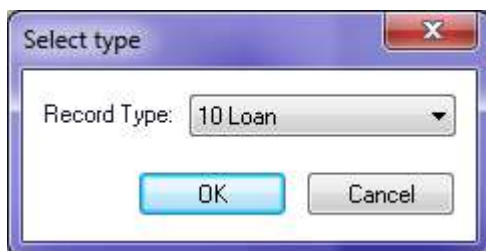

You can add to an established report or create a new report:

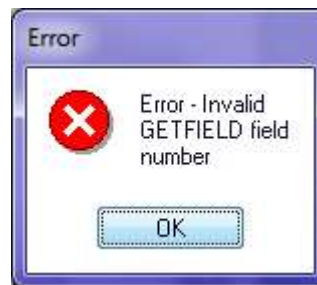

Select a name for the report

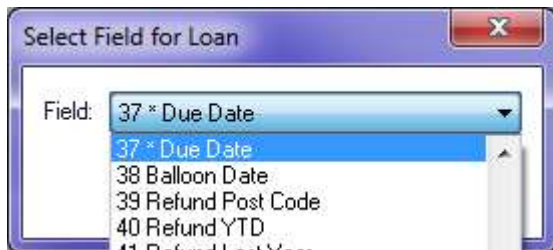

Select the record type to target

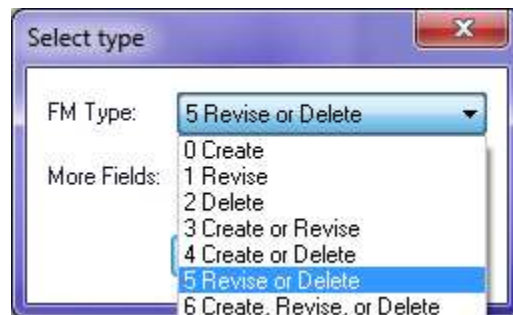

You may get this warning but you can click OK and ignore it.

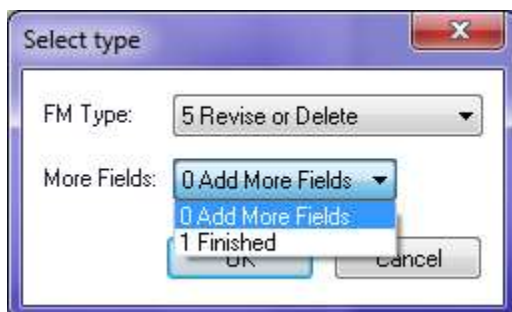

Select the field you want to watch. Previously selected fields will have an asterisk (*).

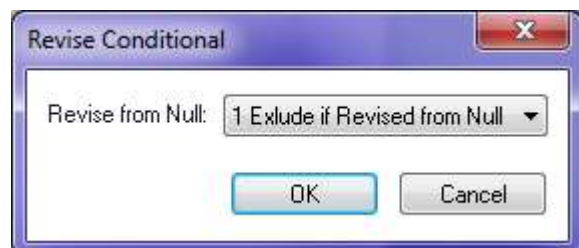

Select the type of modification to be monitored

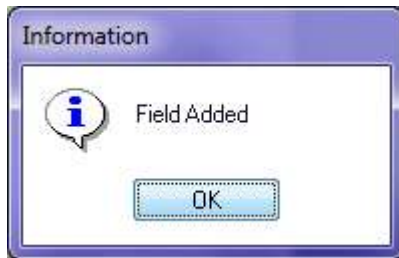

Do you want to add more fields?

Exclude revisions from Null. If a field is empty before the modification do you want it included on the report.

The field has been added to the report

Resave OR.FMHISTORY.RISK.BY.BR to activate the changes

FM History reporting for "At Risk" fields

Run the repgen **OR.FMHISTORY.RISK.BY.BR**

PowerOn

Specification File (newline when done): **OR.FMHISTORY.RISK.BY.BR**

ENTER START DATE: **08/01/2013**

ENTER END DATE: **08/31/2013**

Report List

01) DUE DATE CHANGES

02) ADDRESS CHANGES

03) Employee FM

Select: **0**

Specification File (newline when done):

This will create a Master Report & one report for each branch.
